

Lithium Campus Training Pass

HERE IS WHAT YOU HAVE ACCESS TO ON CAMPUS WITH YOUR TRAINING PASS:

- Over 20 different self-paced courses, from Foundation level through Advanced all the way to Certification.
- Comprehensive training covering all three core products in the Lithium Platform (Community, Reach, and Response).

Receive all-inclusive access to Lithium's online training

Campus is Lithium's Learning Management System (LMS) containing educational content covering all of Lithium's products including Community, Reach, and Response. For one low fee, Campus Pass holders receive complete access to Lithium's comprehensive catalog of online courses, ranging from beginner-level Foundation courses to Certifications. We are continually refreshing existing content and adding new courses throughout the year.

Learning plans to help you map out your education strategy

One of the most often asked questions of the Lithium Education Team is, "What courses should I take?" When you register for your Pass, through consultation with an Education Consultant, you can be enrolled in a Learning Plan appropriate for your role. Once inside Campus, you'll see the recommended courses, the order in which those courses should be taken, and your progress in completing the plan.

How does it work?

The Lithium Campus Training Pass grants a single, named user unlimited access to Campus for a one-year term.
